

Sèti est un fauteuil compact conçu dans une approche minimaliste qui privilégie une utilisation réduite de matière première. Alliant une esthétique intemporelle à des matériaux naturels, peu transformés et issus des Cévennes, il offre un confort adapté à toutes les morphologies. Né de la collaboration entre Huub Ubbens et Arnaud Mainardi, il incarne une approche éco-responsable et un design épuré et élégant..

Sèti is a compact armchair designed with a minimalist approach that emphasizes reducing the use of raw materials. Combining a timeless aesthetic with natural, minimally processed materials sourced from the Cévennes mountains, it offers comfort suited to all body types. Born from the collaboration between Huub Ubbens and Arnaud Mainardi, it embodies an eco-friendly approach and a refined yet elegant design.

METAL

The high quality steels used by Objekto are produced by very carefully selected French or Italian steel manufacturers.

Stainless steel

Stainless steel is highly resistant to corrosion, but like other steel types, it is not immune from the effects of oxidation under extreme conditions. Stainless steel must be kept clean and free from contaminants to achieve maximum corrosion resistance and aesthetic appeal.

Care

- Clean by using a soft cloth
- Never use cleaning abrasives, steel wool or polish
- Do not use chlorine based liquids on the steel as this will cause the steel to rust
- Keep the material dry

Phosphated carbon steel

Carbon steel is the original raw material used in 1957 for manufacturing the first Paulistano armchair. The carbon steel frame is phosphated. The phosphating process is a surface treatment done in order to stop the first main oxidation. Nevertheless, this frame will oxidize slowly with time, according to modernist precepts.

Care

- Clean by using a soft cloth
 - Never use cleaning abrasives, steel wool or polish
 - Do not use chlorine based liquids on the steel as this will cause the steel to rust
 - Keep the material dry
 - To avoid natural oxidation, clean the steel using a soft cloth impregnated with a special oil for steel (we recommend using WD40™ oil)
- Once done, polish up by using a dry and clean cloth

Powder coated steel**Care**

- Clean by using a soft cloth
- Never use cleaning abrasives, steel wool or polish
- Do not use chlorine based liquids

LEATHER

Our leather is vegetable tanned, semi-aniline or aniline. Its raw and natural surface allows the leather to breathe and offers excellent sitting comfort. The leather is full grain, which means that its natural surface structure has been preserved and all natural markings are visible. Natural markings are the hallmarks of the animal's active life and give the piece of furniture a unique sense of character.

Care

- Do not expose to direct sunlight
- Clean by using a soft cloth
- Do not use detergents, chemicals or fats

CANVAS

The canvas used to manufacture our covers are premium ones.

Care

- Clean with a soft brush to remove dust
- For removable items, and before washing the cover, refer to the instructions on the label sewed inside it

WOOD

Woods originate from European sustainable forests.

Care

- Clean with a soft cloth to remove dust

MARBLE

Marble is a beautiful but delicate and porous stone. To prevent ring marks, use coasters under glasses etc. Always clean up spills immediately.

Care

- Dust the surface on a regular basis and wash the marble when needed with a cloth dampened with warm water
- Never use dusting sprays or abrasive cleaners on your marble
- To refresh the stone and protect it, we recommend marble polish
